2.11 Theory

$|\text{Maximum independent edge set}| = |V| - |\text{Minimum edge cover}|$
 $|\text{Maximum independent set}| = |V| - |\text{Minimum vertex cover}|$
 A sequence of non-negative integers $d_1 \geq \dots \geq d_n$ can be represented as the degree sequence of a finite simple graph on n vertices if and only if

$d_1 + \dots + d_n$ is even and $\sum_{i=1}^k d_i \leq k(k-1) + \sum_{i=k+1}^n \min(d_i, k)$ holds for every k in $1 \leq k \leq n$.
